## Digital dual clamp phase voltammeter

It can measure 4 inputs signal (2 channels of voltage, 2 channels of current) simultaneously.

It can measure current phase from 5mA using clamps.

With high-resolution true color TFT, it can display voltage and current true RMS, phase, frequency, power, power factor and other electrical parameters.

It has power quality analysis function.

It can display THD and 2 to 50th harmonic histogram.

It can display voltage and current waveform in real-time.

With bluetooth and USB interface, it can be connected to Android phones. The online app allows users to explore more functions.

size: 210mm×93.5mm×54mm  
weight: 0.5Kg
